PROFILE

Designer, writer, and developer working independently under the name Studio Errant. B.Com. graduate who came to design and code sideways — through curiosity rather than a plan. I build digital products, write about the process, and run small experiments in interface, atmosphere, and attention. Previously operated as The Bandar Co.

SELECTED WORK

Studio Errant (Independent Practice)

Founder | 2024 — Present | Remote

- Design, build, and write about digital products that prioritise atmosphere and attention over engagement.
- Disciplines: artificial intelligence, design, writing, research, experiments, visual media.
- Ship essays, case studies, and tools that document curiosity as a practice rather than a trait.

The Bandar Co.

Designer & Developer | 2022 — 2024 | Remote

- Built and shipped personal portfolio, experiments, and small client web projects.
- Explored Vanta.js topology backgrounds, typed-text interactions, and responsive dark-mode design.
- Iterated on identity until the work found its quieter, more deliberate direction (now Studio Errant).

EDUCATION

Bachelor of Commerce (B.Com.)

University | 2019 — 2022

Studied commerce; kept sketching, designing, and coding on the side.

SKILLS

Design: Interface design, typography, design systems, atmospheric/mood-driven UI, brand identity

Development: JavaScript, TypeScript, React, Next.js, Tailwind CSS, Canvas/WebGL, Node.js

Writing: Essays, case studies, documentation, reflective/first-person narrative

Tools: Git, Figma, VS Code, Vercel, Playwright, ReportLab
